*** Note**

Correct Answer will carry 1 mark per Question.

Incorrect Answer will carry 1/3 Negative mark per Question.

- Options shown in green color with a tick icon are correct.
- Chosen option on the right of the question indicates the option selected by the candidate.

Section : RRB JE DMS CMA

Q Why does our palm feel cold when acetone or petrol is poured on it?

1

A ☒ 1. The liquid increases moisture on skin surface

s

☐ 2. The liquid reacts chemically with our skin surface

☒ 3. The liquid absorbs heat from the skin to evaporate

☐ 4. The liquid blocks heat flow from surroundings

Q Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the 3 given conclusions logically follow(s) from the statements.

Statements:

All apples are mangos.

All mangos are balls.

No ball is a cat.

Conclusions:

(I): No apple is a cat.

(II): Some balls are apples.

A ☒ 1. Both conclusions (I) and (II) follow

n
s

☐ 2. Neither conclusion (I) nor (II) follows

☐ 3. Only conclusion (I) follows

☐ 4. Only conclusion (II) follows

Q Select the set in which the numbers are related in the same way as are the numbers of the following sets.
 . (NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into their constituent digits. E.g. 13 – Operations on 13 such as adding / subtracting /multiplying, etc. to 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.)

Q 8 A student claims that two cars of equal mass, one moving at 40 km/h and another at 80 km/h, have the same kinetic energy if their engines provide the same power. What is the error in this reasoning?

A n s  1. Both cars have equal kinetic energy since both cover the same distance.

 2. Power supplied determines energy, regardless of speed.

 3. The cars have equal energy if the engines are identical.

 4. Kinetic energy depends on the square of speed, not just on power supplied.

Q A question is followed by two statements numbered (I) and (II). You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements carefully and decide the appropriate answer.

5

Question: 5 people, P, Q, X, Y and Z, have an exam on different days of the same week between Monday and Friday. Who has an exam on Thursday?

Statements:

I. P has an exam on Wednesday. Only one person has an exam between P and Q. Z has an exam immediately before X.

II. No one has an exam between P and Y. Only two people have an exam between Y and X. Z does not have an exam on Monday.
